

# NHH Graduate Summer School 2011

## Natural Resource Management and Policy: The Norwegian Model

### Why Norway?

Norway is abundantly endowed with natural resources, and yet has not suffered many of the curses that plague other resource rich countries.

### About the summer school:

NHH faculty delivers the course together with guest lecturers from partner schools and the business community.

Company visits and case studies form a major part of the course.

The course is for MBA and MSc students from NHH's partner institutions who are interested in natural resources and environmental economics

### What we offer you:

- 2 weeks of academic courses on natural resource management and policy
- Knowledge about Norwegian governing policies for natural resources
- Great intercultural experience
- Participation on excursions to get insight in both academic as well as social aspects of the courses (Statoil / Fish farming plant)
- 7,5 ECTS points after passing final group project

### Practical matters:

**Date:** June 17 – July 2

### **Application procedure:**

Online application – requires nomination from home university

**Deadline for application:** May 1.

### **Fees:**

No tuition fee. Travel expenses, accommodation, living expenses and curricular material has to be covered by the participant
